DETAILED ACTION

Objection to the Disclosure

35 U.S.C. 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejection

35 U.S.C. § 102

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by a Canadian Breeder's Right Certificate granted on May 3, 1999 and in view of the following references:

- 1) Agriculture and Agri-Food Canada Strawberry Varieties Developed at Kentwood in which the instant variety is disclosed as having been "released in 1999".
- 2) University of Maine Cooperative Extension Strawberry IPM Newsletter No. 6 from 1999 in which the instant plant is disclosed along with its parent plants.

Art Unit: 1661

35 U.S.C. 102

The claimed Strawberry variety 'Brunswick' is described in Breeder's Right grant number 0618 granted in Canada on May 3, 1999. The publication of the grant took place on August 10, 1999 and the denomination was proposed on March 13, 1997 and then published on June 30, 1998, all of which were more than one year prior to the filing date of the instant application. The claimed strawberry variety is also described in the aforementioned references in which one explicitly states that the variety was publicly released more than 1 year prior to the U.S. filing date. (See enclosed references).

The published application, grant and denomination are each "printed publications" under 35 U.S.C. 102 because they are accessible to persons concerned with the art to which the document relates. See *In re Weyer*, 655 F.2d 221, 226, 210 USPQ 790, 794 (CCPA 1981). See also MPEP § 2128.

For example, UPOV publishes the application number, grant number, date of publication, species of plant, and variety denomination for PBR certificates, and copies of the each grant are obtainable in Canada. All documents relating to the application are open for public inspection. Thus information regarding the claimed variety, in the form of the publications noted above, was readily available to interested persons of ordinary skill in the art.

A printed publication can serve as a statutory bar under 35 U.S.C. 102(b) if the reference, combined with knowledge in the prior art, would enable one of ordinary skill in the art to reproduce the claimed plant. *In re LeGrice*, 301 F.2d 929, 133 USPQ 365 (CCPA 1962). If one skilled in the art could reproduce the plant from a publicly available source, then a publication

describing the plant would have an enabling disclosure. See *Ex parte Thomson*, 24 USPQ 2d 1618, 1620, (Bd. Pat. App. & Inter. 1992) (“The issue is not whether the [claimed] cultivar Siokra was on public use or sale in the United States but, rather, whether Siokra seeds were available to a skilled artisan anywhere in the world such that he/she could attain them and make/reproduce the Siokra cultivar disclosed in the cited publications.”).
